

Endpoint Cloud Backup + Microsoft Office 365 and Google Workspace Backup

Data protection for distributed endpoints + Microsoft Office 365 and Google Workspace Backup, managed entirely via web.

IDrive® 360 is a managed endpoint backup platform for organizations that need a single-point solution for all their cloud backup, and data recovery needs. Deploy the non-intrusive thin client software on hundreds of endpoints in one go.

Perform backup and restore, manage users, via centralized console, create unlimited units, delegate unit administration to users, and remotely supervise all units and users.

Features for effective disaster recovery

Endpoint Device Backup

Ensure organization-wide endpoint protection of Macs, PCs, and Linux computers with automated backup and manage data through a centralized console.

Mobile Backup

Backup photos, videos, contacts, calendar events on your iOS devices, including contacts, SMS, and other files in Android devices.

IDrive® 360 Express

Backup large volumes of data in less than a week via physical data shipment service, ensuring no bandwidth usage.

Google Workspace Backup New

Backup data across Google Workspace and restore directly from the cloud. Protect against accidental deletion and ransomware.

Microsoft Office 365 Backup New

Backup Microsoft applications data with automated backups. Enable granular recovery for quick restoration.

Centralized Management

Create role-based user accounts. Users with admin rights can access both backup and management consoles. Backup managers can only access the backup console.

Encrypted cloud storage

IDrive® 360 uses SSL protocols to secure all communications. AES 256-bit encryption protects data on transfer and storage.

Mass Deployment

Remotely install the IDrive® 360 application on multiple PCs and Macs in one go using Group Policy Object (GPO).

File-level Recovery

Restore critical files instantly from the cloud during disasters and hardware failures with an almost real-time objective.

Point-in-time Restore

IDrive® 360 supports snapshots-based recovery of the latest 30 versions.
